

KPIs and Sales Telemetry

Read the funnel from left to right to locate process gaps and choose the right coaching response.

Use this guide while watching, practicing, and reviewing. Write notes in your own words, then confirm live procedures against the current SOP.

Learning objectives

- Define the six core metrics
- Separate activity from productive progress
- Diagnose where a funnel breaks
- Use metrics for coaching rather than punishment

Key ideas

- Metrics show where to investigate. They do not explain everything by themselves
- Use the current role scorecard for targets
- Check conversion between adjacent stages
- Pair numbers with notes and call review before deciding on a fix

Practice and reflection

- Explain the main idea of KPIs and Sales Telemetry without reading a script.
- Name one behavior you can demonstrate in your next seller or team interaction.
- Write one question you still need a manager or current SOP to answer.
- Record the next action you will take and when you will take it.

Source of truth

Current written SOP, role sheet, offer letter, and manager direction control when live procedures or role terms differ from training.

Quick review

Use these prompts for retrieval practice. Answer first, then compare your response with the guide.

1. According to the text, what is the only thing that actually closes deals in business?
Numbers

2. What analogy is used to describe how KPIs inform a manager about progress?
A car's dashboard

3. KPIs are the tool used to separate being busy from being ____.
Productive

4. The six pipeline metrics are tracked from left to right.
True

5. Why is dial count considered a unique metric compared to others like connection rate?
It is the only metric the caller has one hundred percent control over

6. Dial count is tracked as a leading indicator of ____, rather than as the ultimate goal.
Effort

Manager review notes
