

Compensation Engine

Understand that compensation depends on the value a role owns and that the current written plan is always the source of truth.

Use this guide while watching, practicing, and reviewing. Write notes in your own words, then confirm live procedures against the current SOP.

Learning objectives

- Identify the current compensation source of truth
- Connect role outcomes to the role scorecard
- Know where to take compensation questions
- Avoid relying on another person's plan or an old example

Key ideas

- There is no universal formula for every role
- Use your current offer letter, written plan, or role sheet
- Ask your manager when any part of the plan is unclear
- Do not treat training examples or conversations as a compensation promise

Practice and reflection

- Explain the main idea of Compensation Engine without reading a script.
- Name one behavior you can demonstrate in your next seller or team interaction.
- Write one question you still need a manager or current SOP to answer.
- Record the next action you will take and when you will take it.

Source of truth

Current written SOP, role sheet, offer letter, and manager direction control when live procedures or role terms differ from training.

Quick review

Use these prompts for retrieval practice. Answer first, then compare your response with the guide.

1. What is the source of truth for your current compensation plan?
Your current written agreement
2. Why does the lesson avoid one universal compensation formula?
Different roles own different outcomes
3. Which documents may contain the current written plan?
Offer letter; Current compensation plan; Role-specific sheet
4. If your written plan and a training example appear different, which one applies?
The current written plan
5. Where should you take a question about what applies to your role?
Your manager and current written plan
6. Which outcomes might a role be responsible for creating?
Qualified conversations; Clean handoffs; Operational accuracy; Team performance

Manager review notes
