

Objection Architecture

Use a repeatable framework to understand concerns before selecting a response.

Use this guide while watching, practicing, and reviewing. Write notes in your own words, then confirm live procedures against the current SOP.

Learning objectives

- Apply Listen, Acknowledge, Ask, Redirect
- Classify common objection types
- Avoid arguing with the seller
- Choose a response that matches the concern

Key ideas

- An objection is information before it is resistance
- Acknowledge without automatically agreeing
- Ask enough to identify the real concern
- Redirect only after the seller feels heard

Practice and reflection

- Explain the main idea of Objection Architecture without reading a script.
- Name one behavior you can demonstrate in your next seller or team interaction.
- Write one question you still need a manager or current SOP to answer.
- Record the next action you will take and when you will take it.

Source of truth

Current written SOP, role sheet, offer letter, and manager direction control when live procedures or role terms differ from training.

Quick review

Use these prompts for retrieval practice. Answer first, then compare your response with the guide.

1. What is the primary factor that distinguishes a top-performing caller from an average one?

Their response when a seller pushes back or provides an objection

2. Instead of viewing an objection as a rejection, how should a caller rewire their thinking?

As a conversation that still has momentum

3. How does the text define 'complaints' in the context of real estate calls?

Frustrated venting from sellers who have likely received many investor calls

4. What is the primary mistake to avoid when a seller uses a reactionary defense response like 'you've got two minutes'?

Speeding up the process because the seller told you to hurry

5. What is the primary goal of the 'Acknowledge' step in the objection framework?

To show the seller you actually heard and understand their concern

6. What is the objective of the final step, 'Redirect,' in the objection handling framework?

To guide the conversation toward a potential solution once the concern is understood
